

The algorithm that I implement to find immigrants

Result: True if the given twitter account is immigrant

let *Timeline* be List of Tweet objects containing (Date, Text, Country)

let *Country_Set* be list of unique country names ordered by first appearance date

```
if len(Country_Set) > 1 then
    if Timeline[-1].Country == Country_Set[-1] then
        if Duration of Country_Set[-1] > 3 Months then
            return true
        else
            else
    else
        return false
end
```
